

## WEATHER SONGS

The project is not only about taking temperatures and learning greetings phrases from our partner countries. It is also about singing and having fun. Every country recorded one song about the weather to share it with the others.

Girls from the fifth class presented a canon song Veter vije (Howling Wind). Spain brought sunshine, whilst Wales and England filled the room with rain.

## COMENIUS PROJECT

# SLOVENIA IN IZMIR

17th—21st February

## WHEN YOU FEEL ACCEPTED...

The children and the teachers at Yamanlar College surprised us with their extreme hospitality and wonderfully prepared programmes.

Students were open and talkative, and above all, they knew a lot about our country.

The main idea of our meeting was sharing love and peace.

## MI SE IMAMO RADI

The head teacher Zoran, Geography teacher Tanja, English teacher Blaž and myself enjoyed ourselves a lot in the class 6.b.

We taught the students some Slovenian words but the best thing about the lesson was singing and dancing. Mi se imamo radi echoed along the corridors long after the class had finished. Kdor ne skače, ni Slovenec proved to be true as well.

The Slovenian team 'won' the title for 'the most cheerful country'. And indeed we were with singing, dancing, jumping and hugging.
