

# SIGHTSEEING

Each country offers not only school systems and teaching methods but also its most prominent and well-known places worth seeing. In Tuscany, Florence must be visited, near Fram, Ptuj and Maribor are towns which were shown to our guests.

# EATING WELL AND HAVING FUN!

Slovenians are not only good at learning foreign languages, they are also good singers, dancers, excellent party makers and great eaters. Our guests experienced a bit of everything in Slovenia. They harvested grapes, sang and danced a lot. All combined with excellent food and the best wines.

# MEETING IN ITALY AND SLOVENIA

FOOD FOR THOUGHT  
NEWSLETTER N°7  
NOVEMBER-DECEMBER 2009

## A WARM WELCOME IN BOTH COUNTRIES

Different countries, different customs but children are the same—lively, curious and more than happy to heartily greet our Comenius family consisting of nine countries. We all felt joy while standing in front of the classes and sharing our cultures with children who gratefully absorbed every information.

In Italy, we visited two schools—Rignano sull'Arno and Incisa in Val d'Arno. Both of them surprised us with children who seem to live with our project. They all preformed weather songs in different languages, greeted us at solemn ceremonies, and this really felt great.

Slovenian children, on the other hand, prepared themselves for the visit very well. They made power point presentations about each country, flags and wooden children, and prepared different exhibitions. Above all, they were looking forward to visits in the classes.

Even though we 'live' together for only a few days, we make strong bonds of love and goodwill.

Another salutary feeling of our visits is sharing everyday life at schools and outside them. Our rhythms merge.
